This short video will demonstrate how to find nursing related databases. From the library homepage, click on the Databases ‘A to Z’ link.

You can search for databases by name or browse alphabetically or by subject.

The library has created lists of databases relevant to a particular subject or discipline area. Nursing students can find an alphabetical listing of suitable databases by clicking on the Nursing or Health & Medical Sciences links.

Highlighted in red is a selection of key nursing databases. Databases highlighted in red Academic Search Premier, CINAHL with full text, Informit Health Collection, MEDLINE with Full text via EBSCO HOST and MIMS Online.

There is a brief description available for each of the databases listed. Click on full details for a more in depth overview of the database.

On this page, you will find further information about the database, additional support resources for example user guides, authorised user and login requirements. To connect to the database click on the title or to return to the databases listing use the back button on your internet browser.

Back on the databases listing page, you can also get access the database by click on the title.

Remember when off campus you will be prompted for your VU ID number and library pin.

Please contact the VU library for further assistance: Ask a Librarian’ via chat and email, visit a VU library service desk or contact your Health and Biomedicine librarian’s.
